Curriculum Enrichment Offer

Why we believe in the Arts, Creativity and Culture

We know, from evidence and experience, that children who take part in arts and culture do better in school and are happier and healthier. As young adults they are more likely to vote, go to university, and to secure and stay in a good job.

At Brinsworth Howarth Primary every child will be given the opportunity to: -

- Learn to play a musical instrument
- Work with an artist
- Go on a residential
- Be part of a production
- Gain visual art skills and exhibit their work
- Sing in a choir
- Visit places of interest
- Become a confident speaker
- Watch a production
- Have a love of reading
- Support the local community
- Take part in a sporting competition
- Raise money for charity
- Gain Children's University status

We dream of a future where being creative and experiencing brilliant culture is a regular part of every child's learning experience.

As a school we map out what each class will experience during the school year, this is open to all children as we are ferociously committed to identifying and removing the systematic, social and economic barriers that stop children from marginalised backgrounds engaging in arts and culture.
